Nintendo Entertainment System™ (NES™), launched in the U.S. in 1985, has set the foundation of the current video game industry in the West and introduced millions of players to the compelling worlds of Mario, Zelda, Metroid and more. Now held in high esteem by gamers all over the world, it's still "the control deck that puts you in control of incredible fun!"

Lancée aux États-Unis en 1985, la console Nintendo Entertainment System™ (NES™) a posé les bases de l'industrie actuelle du jeu vidéo en Occident et initié des millions de joueurs aux mondes fascinants de Mario, Zelda, Metroid et plus encore. Maintenant tenue en haute estime par les joueurs du monde entier, elle est encore aujourd'hui « la console qui vous met aux commandes d'un plaisir incroyable ! »

Comercializada en los Estados Unidos en 1985, la consola Nintendo Entertainment System™ (NES™) sentó las bases de la actual industria del videojuego en el mundo occidental y sumergió a millones de jugadores en los fascinantes mundos de Mario, Zelda y Metroid, entre muchos otros. Altamente valorada por jugadores de todo el mundo en la actualidad, sigue siendo "¡el sistema que revoluciona los videojuegos!".

When we set out to recreate this classic TV and console combo, we wanted to do more than just build models that looked the part. We also wanted them to be packed with features and functions from the originals. That's why small but authentic details such as input/output slots, antennas and controls are there, and why you can place a Game Pak in the console, change channels on the TV and watch a "moving" image.

Lorsque nous avons entrepris de recréer cet ensemble de télé et console classiques, nous voulions faire plus que simplement construire des modèles ressemblants. Nous voulions aussi reproduire les caractéristiques et les fonctionnalités des originaux. C'est pourquoi nous avons inclus de petits détails authentiques tels que les fentes d'entrée et de sortie, les antennes et les commandes, et c'est aussi pourquoi vous pouvez insérer une cartouche dans la console, changer de chaîne sur le téléviseur et regarder une image « en mouvement ».

Quando nos propusimos recrear esta combinación de televisor clásico y consola, decidimos no conformarnos con un par de modelos que reflejaran el aspecto real de cada cosa. Queríamos que contaran con un montón de características y funciones que reflejaran las de los objetos originales. De aquel punto de partida surgieron pequeños detalles de gran realismo, como los conectores de entrada/salida, la antena y los controles, o la posibilidad de introducir el cartucho del juego en la consola, cambiar el canal del televisor o ver una imagen "en movimiento".

Versión LEGO®

In the early 1980s, the team at Nintendo set an ambitious goal: to develop a new cartridge-based video game console that would deliver experiences that were then available only on powerful arcade counterparts. The NES would go on not only to offer the thrill of arcade games in the home, but to usher in entirely new types of experiences.

Au début des années 1980, l'équipe de Nintendo s'est fixé un objectif ambitieux : développer une nouvelle console de jeux vidéo qui utiliserait des cartouches et proposerait une expérience qui n'était alors offerte que par de puissants jeux d'arcade. La NES poursuivra sa lancée pour non seulement offrir le frisson des jeux d'arcade à la maison, mais également ouvrir la porte à des types d'expériences entièrement nouveaux.

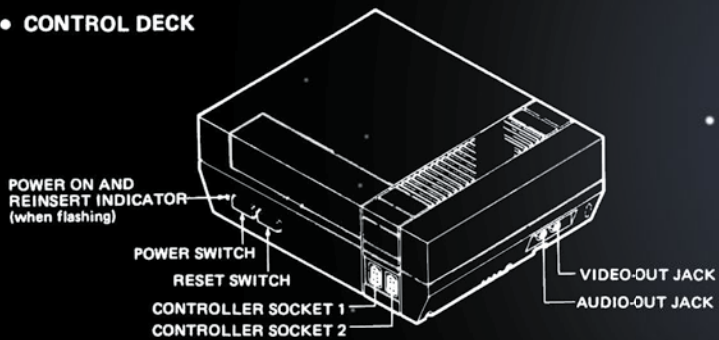

A principios de la década de 1980, el equipo de Nintendo se fijó un ambicioso objetivo: desarrollar una nueva consola de videojuegos basada en cartuchos que ofreciera experiencias hasta entonces solo disponibles en las máquinas recreativas más potentes. El NES no solo permitiría disfrutar de toda la emoción de las maquinitas en casa, sino que daría lugar a algo que sorprendió a todo el mundo.

It was LEGO® designers Pablo Gonzalez, Leon Pijnenburg and Daire McCabe who took up the challenge of creating LEGO replicas of both the NES and a retro-styled 1980s TV. Luckily the size of a number of existing LEGO elements matched closely with key visual details on the original console and controller, allowing the designers to construct models that were as close to true-to-scale as possible. The TV, while not 1:1, actually matches the instructional drawings in the original booklet that came with the NES when it launched. How successful were the LEGO designers? Simply pick up the controller and experience how your "muscle memory" kicks in – all the controls and buttons are exactly where your thumbs remember them to be!

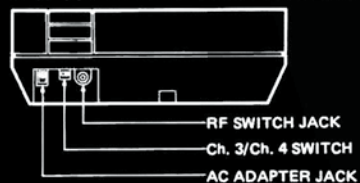

Ce sont les concepteurs LEGO® Pablo Gonzalez, Leon Pijnenburg et Daire McCabe qui ont relevé le défi de créer des répliques LEGO de la NES et d'un téléviseur rétro des années 1980. Heureusement, la taille d'un certain nombre d'éléments LEGO existants correspondait étroitement avec les détails visuels clés de la console et de la manette d'origine, permettant aux concepteurs de construire des modèles aussi proches de l'échelle réelle que possible. Le téléviseur, même s'il n'est pas à l'échelle 1:1, correspond aux dessins d'instructions dans le livret original inclus avec la NES à son lancement. Dans quelle mesure les concepteurs LEGO ont-ils réussi ? Il suffit de prendre la manette pour raviver votre « mémoire musculaire » – les commandes et les boutons sont exactement là où vos pouces se souviennent !

Pablo González, Leon Pijnenburg y Daire McCabe fueron los diseñadores de LEGO® que aceptaron el desafío de crear réplicas LEGO del NES y de un televisor como los de los años 80. Afortunadamente, el tamaño de varios de los elementos LEGO disponibles se ajustaba a los principales detalles visuales de la consola y el control originales, lo que permitió a los diseñadores construir modelos que se aproximaban en gran medida a las dimensiones reales. El televisor, aunque no mantiene la escala real, se ajusta a los esquemas gráficos que incluía el manual de instrucciones que acompañaba al NES cuando se lanzó al mercado. ¿Qué tanto éxito obtuvieron los diseñadores de LEGO? Solo tienes que agarrar el control y ejercitar tu "memoria muscular": ¡todos los elementos de dirección y botones están exactamente donde recuerdan tus pulgares!
