

UNSC QUAD WALKER

UNSC QUAD WALKER

The UNSC Quad Walker is a highly advanced prototype all-terrain walker based loosely on a number of Covenant models, including the T-30 Locust. Deployed from space much like a drop pod, the vehicle's short-range boosters unfold upon entry, effectively becoming its four fully-articulable legs. The walker's primary weapons are two high-mounted plasma cannons, similar to the Covenant's Shade turret.

ROBOT QUAD DE CENU

El Robot Quad de CENU es un prototipo de robot todoterreno muy avanzado basado en una serie de modelos Covenant, incluido el T-30 Locust. Desplegado desde el espacio de la misma manera que una cápsula de desembarco, los propulsores de corto alcance del vehículo se despliegan al entrar, convirtiéndose en sus cuatro patas totalmente articuladas. Las armas principales del robot son dos cañones de plasma montados en alto, similares a la torreta del Covenant's Shade.

QUADRUPÈDE DE L'UNSC

Le Quadrupède de l'UNSC est un prototype de marcheur tout-terrain inspiré des véhicules du Covenant, dont le Locust T-30. Il est déployé de l'espace comme une capsule d'atterrissage, ses fusées d'accélération à courte portée se déploient lors de sa descente et se transforment en jambes entièrement articulées. Les armes principales du marcheur sont deux canons à plasma fixés en hauteur, comme la tourelle Shade du Covenant.

RVN QUAD-LÄUFER

Der RVN Quad-Läufer ist der Prototyp eines Gelände-Läufers, der auf einer Reihe von Covenant-Modellen einschließlich des T-30 Locust basiert. Er wird ähnlich wie ein Drop Pod aus der Luft herabgelassen, seine Kurzstreckenturbinen fahren aus und werden zu seinen vier voll beweglichen Beinen. Die Hauptwaffen des Läufers sind zwei hoch montierte Plasmakanonen, ähnlich wie bei einem Covenant Shade-Turm.

RVN QUAD-LOOPROBOT

De Quad-looprobot van de RVN is een zeer geavanceerd prototype voor alle terreinomstandigheden, die is geïnspireerd op een aantal Covenant-modellen, waaronder de T-30 Locust. De robot wordt vanuit de ruimte ingezet, ongeveer zoals een Drop Pod. Na aankomst ontvouwen de korteafstandstraalraketten zich tot vier benen met volledige scharnierfunctie. De primaire wapens van de looprobot zijn twee hoog gemonteerde plasmakanonnen, die vergelijkbaar zijn met de Covenant Shade-geschutskoepel.

CAMMINATORE QUADRUPEDE UNSC

Il Camminatore Quadrupede UNSC è un prototipo estremamente moderno di camminatore fuoristrada basato in pratica su un numero di modelli Covenant, compreso il Locust T-30. Mandato in missione dallo spazio sotto forma di capsula d'atterraggio, i razzi a corto raggio del veicolo si dispiegano all'ingresso, diventando quattro gambe totalmente articolabili. Le armi principali del camminatore sono due cannoni con montatura elevata, simile alla torretta dell' Ombra Covenant.

ANDADOR QUADRÚPEDE DO CENU

O Andador Quadrúpede do CENU é um protótipo altamente avançado do andador todo-terreno baseado em uma série de modelos de Covenant, incluindo o T-30 Locust. Despachado a partir do espaço como um casulo de desembarque, os propulsores de curto alcance do veículo desdobram-se na aterrissagem, tornando-se efetivamente suas quatro pernas totalmente articuláveis. As armas primárias do andador são dois canhões de plasma montados em posição elevada, semelhante à torre Covenant's Shade.
